A unique polypropylene 3-layered material (SMS)

Kimberly-Clark* SMS (Spunbond, Meltblown, Spunbond) is made up of three layers of polypropylene:

- The spunbond outer layers provide exceptional strength and durability.
- The meltblown middle layer provides an effective barrier to bacteria and liquids.
- The material has a low lint level, reducing the risk of contamination in the OR.
- The micro-fibres of SMS allow gas sterilants (steam, ethylene oxide and plasma) to permeate.

Kimberly-Clark Sterilisation Wrap: KINGUARD*

Benefits of Kinguard* SMS

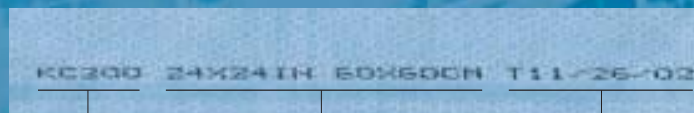

- High strength of the material, to avoid costly tearing
- Effective barrier to bacteria and liquids
- Low lint level, reducing the risk of contamination in the Operating Theatre
- Soft, cloth-like drapability
- Easy-to-use for aseptic opening
- Available in multiple strengths to meet your needs and to optimise cost-efficiency

Kinguard One-Step*: A Timely Idea

Kimberly-Clark has moved quickly to bring you our latest technology: Kinguard One-Step* sterilisation wrap.

The revolutionary design of Kinguard One-Step* utilises two sheets of wrap thermally sealed along the sides. You will get the protection of double-sequential wrapping, only now packages can be wrapped or opened in a single step! This means a measurable jump in productivity!
